## **Professional Growth Plan**

*What do you want to learn more about? (Growth Goal)*

I want to learn to use more assessment strategies, so that I can better evaluate my students' knowledge.

*Describe why you selected this growth goal. Be positive in describing what you hope to accomplish; don't list your weakness!*

I selected this goal because I feel that on my last practicum I did not assess my students enough or in a variety of ways. I want to be able to give my students the opportunity to show me their knowledge in a way that is comfortable for them. I hope to use some of the new assessment strategies I have learned from my assessment course to give my students a more balanced assessment.

*Action Plan (there are many ways to achieve professional growth. Select a practical strategy that fits within your practicum, available resources and time!)*

When planning for my next practicum I am going to put a lot of thought into the learning outcomes I set for each unit. After I have come up with the learning outcomes I will structure the unit around these outcomes. Each unit will have at least three different assessment techniques to give the students several ways of displaying their knowledge.

*Indicators of Success (how will you know that you achieved what you wanted to?)*

I will know if I have achieved my goal once I have completed each unit. I will be able to look back and see that evidence of my assessment techniques for each learning outcome. I believe I will also know I have achieved my goal by the way I feel at the end of the unit, if I have succeeded I will feel a sense of peace knowing that I gave each student a fair chance at demonstrating their knowledge and learning.

*Results/New Goals/ Further Reflections*
